“Version with Markings to Show Changes Made”

IN THE CLAIMS:

13. A method as set forth in claim 1 wherein
the global distribution system provides specifics for the event including [the] a flight number, [the] a time of departure from [the] a starting position and a [the] time of arrival at [the] a destination.

22. A method as set forth in claim [19] 20 wherein
the prices from the legacy distribution system and the non-legacy distribution sources for the event pass through an [i]Internet router after passing through the [i]Internet and before passing to the display screen.

23. A method as set forth in claim [19] 20 wherein
the prices from the legacy distribution system and the non-legacy distribution sources for the event pass through an [i]Internet router after passing through the [i]Internet and before passing to the display screen.

28. A method as set forth in claim [26] 18 wherein
an accounting application at the processing station provides an accounting of the
ticket printed at the processing station and selected from the legacy distribution system and the
non-legacy distribution sources for the event.

31. A method as set forth in claim 29 wherein
the request from the processing station specifie[d]s the event and the day of the
event and wherein
the specifics from the legacy servers and the non-legacy servers identify the event
and specify the time of the event during the specified date and specify the price for the event and
wherein
the display shows the specifics set forth by the legacy servers and the non-legacy
servers to the display.

40. A method as set forth in claim [37] 39 wherein
the event is a trip on a specified day and the specifics provided for the event by
the sources include [the] a time of departure by a carrier during the specified day and [the] a time
of arrival of the carrier at [the] a destination and [the] a flight number and [the] a price.

41. In a method of providing at a processing station an indication of a minimal price for an event, the steps of:

providing through the [i]Internet from the processing station to non-legacy servers a request for information concerning the event where [the] a date and specifics of the event are specified,

providing through the [i]Internet from non-legacy servers information fulfilling the request and specifying the times on the particular date for the event and specifying [the] a price for the event and specifying [the] an identification of [the] an event by the non-legacy servers to the processing station, and

providing a display at the processing station of the information provided through the [i]Internet from the non-legacy servers to the processing station.

42. [In a] A method as set forth in claim 41 wherein

the event is an airplane trip and wherein

the specifics requested by the processing station concerning the event include the date of the trip and [the] an originating position and [the] a destination and wherein

the information provided by the non-legacy sources includes [the] an airline providing the transportation, the date of the event, the originating position, the destination, [the]
